2017 SCRUM REVIEW

The completion of the 2017 School Rugby Program report shows a number of major achievements and developments. One that comes to mind immediately is the the commitment and enjoyment of volunteers, staff and the sport teachers, to continue the rugby awareness into the hearts and minds of the young children in Morobe.

It is also equally important for the development team and teachers to expose their knowledge and experiences in management and administration of the rugby programs and competitions. Administering and coordinating a program, which involved more than over ten thousand (10,000) young players in the five districts of Morobe is a mammoth task. I am very proud of Robin and his staff on the hard work they carry out every day of the week.

RUGBY SKILLS EXPO & AWARDS

The School Rugby Expo was aimed to promote friendship, fun, and healthy life style. This was organized at the end of every school term where all schools involved in the program participate in a fun day of activities and interact with other school children. Late Sept last year we held three mini rugby expos, one in Lae Bulolo and Huon Gulf for the Lae urban schools. The children participated in 3 divisions under 12, under 13 and under 14 years old. All 3 expos were held at the scrum oval with awards given out to participating schools.
